

Fire Safety Friends Of Russia

ABOUT US

Simon Boyling
Trustee

I have worked for West Sussex Fire & Rescue since 1999 and have been in the role of Station Manager since December 2006. I'm currently in charge of the Resource Management Centre (RMC) based at Service Headquarters, Chichester. I provide a command support role to Services Command and Mobilising Centre on a flexi-duty basis.

Before joining the Fire & Rescue Service I worked as a Contract's Manager and qualified engineer for a Civil Engineering/Perimeter Security contractor working on various projects including the Channel Tunnel, Railtrack Projects and London Underground.

I have been involved with the Charity since meeting Chris at Amberley Museum Fire Show back in 2005 and have helped with various fund raising events since then as well as assisting with the preparation of vehicles and equipment for shipment to Russia in 2008 when I was lucky enough to visit the Kursk region to see our efforts first hand. My work with the Charity prompted me to obtain my LGV licence in 2007 which has been very useful both for the Charities work and my current role within WSF&RS.
